

Cody Arnold

Fort Wayne, IN, USA | [linkedin.com/in/codyarnold96](https://www.linkedin.com/in/codyarnold96) | github.com/Wranngle | US Military Veteran

PROFESSIONAL SUMMARY

Senior Automation & Distributed Systems Engineer with 9+ years building real-time, event-driven architectures for enterprise environments. Architected high-availability automated workflows managing 4,000+ endpoints across 100+ client organizations, achieving 40% reduction in manual oversight and sustained 99.9% uptime through self-healing pipeline design. Production builder of voice AI agents using RESTful API integrations (Twilio, Telnyx, Bandwidth) and event-driven orchestration. Experienced with cloud infrastructure (Azure, DigitalOcean), CI/CD delivery discipline, and on-call incident response patterns in MSP production environments. Proficient with AI coding assistants (Claude Code, OpenAI) for accelerated, correctness-reviewed development. US Military veteran.

CORE COMPETENCIES

Event-Driven Architecture

Distributed Systems

RESTful API Design

Real-Time Voice Services

Cloud Infrastructure (Azure/GCP)

CI/CD Pipelines

High-Availability Systems

AI Coding Assistants

WORK EXPERIENCE

Applied Technology Group, Inc.

Dec 2016 - Present

Automation Engineer · Fort Wayne, IN

- Architected and deployed real-time inbound/outbound voice AI agents using event-driven orchestration (n8n + OpenAI Realtime API) integrated with Twilio, Telnyx, and Bandwidth - replacing front-desk and Tier-1 support workflows end-to-end with zero-variance, 24/7 availability.
- Engineered distributed automation across **4,000+ endpoints** spanning 100+ MSP client environments using Python and PowerShell; **reduced manual oversight by 40%** through self-healing workflows and proactive alerting pipelines.
- Designed RESTful API integrations and event-driven data syncs across CRM (HubSpot, Salesforce, ServiceTitan) and billing (Stripe, QuickBooks) platforms via n8n and Python webhooks - processing thousands of events/day with **99.9% uptime**.
- Built **700-guide automation framework** standardizing delivery patterns and SOPs across a 10-person engineering team; authored runbooks that reduced onboarding time and became the team's canonical reference for troubleshooting and deployment.
- Deployed custom RAG chatbots ingesting client business data via OpenAI/Anthropic APIs, connected to website and Slack endpoints - enabling instant, accurate query resolution without human escalation.
- Proficient with AI coding assistants (Claude Code, OpenAI API) to accelerate development velocity; reviews AI-generated code for correctness, edge cases, and security before production deployment.
- Stack:** n8n, Python, PowerShell, OpenAI API, Anthropic Claude, Gemini, Twilio, Telnyx, Bandwidth, Azure, DigitalOcean, HubSpot, Salesforce, Stripe, Microsoft 365

Red Cup IT

Jun 2023 - Nov 2023

Senior System Engineer · Remote

- Senior engineer focused on cybersecurity compliance, cloud migration strategy, systems architecture, and automation delivery for enterprise clients.

Network Technician · Indiana (21 campuses)

- Executed statewide network refresh across 21 campuses - installed and configured Cisco switches, routers, and 50+ wireless access points; maintained **\$1M+ in IT assets** including 75 UPS units with 99.9% uptime.
- Created Visio network topology maps for all 21 sites; became the org standard reference for troubleshooting and security audits.

PROJECTS

Production Voice AI Agents Live

Real-time inbound/outbound phone agents handling support routing, booking, and call triage for multiple enterprise clients. Replaces front-desk and Tier-1 support end-to-end with zero variance and 24/7 uptime.

OpenAI Realtime API · n8n · Twilio / Telnyx / Bandwidth · RAG pipeline · RESTful webhooks

Custom RAG Chatbots Live

Retrieval-Augmented Generation bots ingesting client-specific business data via vector store; deployed to websites and Slack. Provide instant, accurate answers without human escalation.

OpenAI API · Anthropic Claude · n8n · vector store · REST API integrations

AI Lead Parser Agents Production

Event-driven agents that parse messy inbound emails and forms, extract structured fields (Name, Budget, Sentiment, Intent), and populate CRM records instantly - replacing manual SDR triage.

OpenAI API · n8n · HubSpot / Salesforce / ServiceTitan · Python webhooks

Algorithmic Trading Bot Open Source

Event-driven trading system on QuantConnect. Implements shouldBuy/shouldSell logic, stop-loss/take-profit calculations, and sector analysis - demonstrating algorithmic discipline and risk management primitives.

Python · QuantConnect · event-driven architecture · github.com/Wranngle/tradingbot

EDUCATION

Associate's, Network Infrastructure · Ivy Tech Community College

2014-2016

Computer Maintenance & Repair · Anthis Career Center

2013-2014

CERTIFICATIONS

Microsoft Certified: Power Platform App Maker Associate · Microsoft

2023

Microsoft 365 Certified: Enterprise Administrator Expert · Microsoft

2022

Microsoft 365 Certified: Security Administrator Associate · Microsoft

2022

Microsoft Certified: Azure Fundamentals · Microsoft

2021

CCNA Routing & Switching · Cisco

2015

CompTIA Security+ ce / CompTIA Secure Infrastructure Specialist · CompTIA

2015

SKILLS

Automation & Orchestration: n8n, Make.com, Zapier, Rewst, event-driven pipelines

AI / LLMs: OpenAI API, Anthropic Claude (Claude Code), Gemini, Vapi.ai, ElevenLabs, RAG architectures, prompt engineering

Languages: Python, JavaScript, PowerShell **Voice / Telephony:** Twilio, Telnyx, Bandwidth, OpenAI Realtime API

Cloud & Platforms: Azure, DigitalOcean, Microsoft 365, Google Workspace, ServiceTitan, HubSpot, Salesforce, Stripe

Networking & Infrastructure: Cisco IOS, REST APIs, Webhooks, JSON, distributed systems, network topology

Other: CI/CD delivery, SOP / runbook authoring, web scraping, incident response, on-call patterns
